SOFT MOB

Context

The enhancement of cross-border mobility of learners, trainers and staff is a key issue to increase the opportunities for building personal curricula through learning experiences abroad.

Within this context the project partnership has identified the need of providing those involved in Mobility initiatives with a stronger capacity to perform the daily management of high number of mobilities through digital based tools and processes.

Target Groups

The project addresses the needs of the main protagonists of Mobility initiatives:

- Internal staff of the sending institutions
- Internal staff of Hosting institutions
- Staff of Companies hosting WBL mobilities

Aim

The objective of the SoftMob project is to answer to the needs of all the actors playing a part in Mobility initiatives by:

- Reducing the administrative and management burden of the different activities in order to better concentrate on the quality of the contents
- Improving the effectiveness of the management of Mobility initiatives through exemplary best practices

Expected Results

The main project results include:

- A Software to be used to manage Mobility initiatives, reducing the related operative burden and allowing to concentrate on their quality
- A collection of Video interviews with the protagonists of Mobility projects focusing on the different everyday challenges that they have to face and the best solutions they adopt to overcome them.
- A collection of Tools, Models and Templates to be easily used to improve the quality and effectiveness of the management of operative tasks that are part of Mobility projects
